DISCOVER THE

Galápagos Islands

A Family Adventure

aboard the First-Class Exploration Vessel

Santa Cruz II

July 25 to August 2, 2019
Dear Alumni and Friends:

You and your family can join us on this incredible, once-in-a-lifetime adventure to experience what Charles Darwin keenly observed of the Galápagos Islands: “The natural history of this archipelago is very remarkable ... the greater number of its inhabitants, both vegetable and animal, being found nowhere else.” Home to the rare exotic birds, plants and wildlife that inspired Darwin, this “living laboratory of evolution” and UNESCO World Heritage site continues to offer the excitement of original discovery to explorers of all generations.

Cruise aboard the first-class exploration vessel SANTA CRUZ II, specifically designed to navigate the archipelago’s remote waterways and delicate ecosystem. The ship is fully equipped to make your family’s adventure complete, with adjoining cabins, a glass-bottom boat to view underwater marine life, Zodiacs for excursions and snorkeling gear. Certified onboard naturalists lead small groups on land and water excursions and share their in-depth knowledge with you and your Young Explorers.

Discover the biodiversity of the islands, teeming with vibrant flora and fascinating species not located elsewhere in the world, like the flightless cormorant and the marine iguana. With few natural predators on the islands, the abundant wildlife is nearly fearless and surprisingly receptive to up-close human presence, unlike any other place on Earth. Observe the vast variety of animal life, including sea lions, albatross and giant tortoises; here, you can almost touch spiny-backed iguanas and snorkel alongside playful sea lions—an amazing experience for the entire family.

To complement your Galápagos Islands cruise, we are pleased to offer an exclusive family Pre-Program Option in Quito to visit the Equator and stand in two hemispheres at once, explore the fascinating Ethnographic Museum and tour Quito’s picturesque UNESCO World Heritage-designated colonial district. On the Post-Program Option, discover the marvels of the UNESCO World Heritage site of the legendary “lost city” of Machu Picchu and the breathtaking Sacred Valley.

This popular family travel program through the “Islands of the Tortoises” is ideal for each generation of explorer—from the inquisitive young scholar to the seasoned traveler. It is an exceptional value, so reserve now while Early Booking Savings are available.

Sincerely,

Lisa Valentine

The enigma of the

Galápagos Islands

“The Archipelago is a little world within itself...”
— Charles Darwin, The Voyage of the Beagle

This multigenerational adventure explores a remote archipelago—consisting of islands and islets 600 miles off the coast of Ecuador—that inspired one of the most revolutionary scientific theories in history. Formed millions of years ago by volcanic eruptions, the Galápagos Islands’ dramatic landscapes now make safe homes for the iconic, quirky finches and primeval iguanas that inspired Charles Darwin’s theory of natural selection and evolution, which he presented in On The Origin of Species in 1859.

Scientists theorize that some Galápagos species were transported by birds or by whalers and buccaneers, and others by way of the Humboldt Current, a cold ocean stream flowing from the southern coast of Chile. This current makes the Galápagos the world’s only tropical region to support such species as the Galápagos penguin.

Darwin noted that life in the Galápagos Islands is comprised of mostly “aboriginal creations, found nowhere else,” which led him to hypothesize that the islands’ species survived by evolving independently from their continental cousins. Without natural predators, a bevy of birds and animals were able to thrive and adapt in a manner not possible in other habitats. Thus, Galápagos species never developed a fear of humans and allow the near contact that will create a thrilling and unique adventure for your family!

On South Plaza Island, watch yellow and gray land iguanas waiting to feast on sweet pear fruit dropping from the cactus grove among a landscape of crimson succulents. Machu Picchu and the Sacred Valley
Post-Program Option

Enjoy this extraordinary opportunity for your family to experience Machu Picchu, the majestic “lost city of the Incas,” the lush Sacred Valley; and the colonial and Inca traditions of Cuzco.

Perched on a mountain range in the Peruvian Andes, Machu Picchu was obscured from humankind for 400 years until Yale Professor Hiram Bingham literally stumbled upon it in 1911. A century of extensive research and study has not revealed its secrets; nevertheless, this UNESCO World Heritage site has been carefully excavated and preserved.

Explorers will delight in the archaeological sites of the beautiful Sacred Valley, where ancient engineering marvels, such as the fortress of Ollantaytambo, stand in testimony to the powerful influence of the Inca Empire. Here, village craftsmen employ age-old techniques to weave intricate tapestries and sculpt colorful pottery.

In the historic Inca capital of Cuzco, a UNESCO World Heritage site, marvel at the Inca stone fortress of Sacsayhuamán and grand Baroque- and Renaissance-style architecture that provides a fascinating mix of pre-Columbian and colonial influences.
